

"Fannin Regional Hospital is committed to investing in the technology necessary to provide quality patient-centered healthcare close to home. What makes our hospital truly special is the personalized care that patients receive from our experienced and dedicated team of physicians, nurses, clinicians and volunteers."

— Scott Smith
Chief Executive Officer

HOSPITAL SERVICES

FANNIN
REGIONAL HOSPITAL

Your Hospital

At Fannin Regional Hospital, we're committed to providing quality care to the people in our community. Established in 1977, we have grown to a 50-bed acute care facility serving the people of the Tri-state area. Physicians on staff at our hospital specialize in everything from emergency and preventive care to cardiology and surgery, including orthopedic, minimally-invasive general and gynecological surgeries. We pride ourselves on our unique dedication to the community hospital experience. While we believe it's vital to stay up to date with technology, we will never lose sight of what's truly important – the human interaction that is crucial to providing quality care.

*Quality Care.
Right Here.*

The dedicated team at Fannin Regional Hospital takes the responsibility of care for you and your family to heart every day – because you are our friends and neighbors. More than 250 people in our community work at the hospital, and our growing medical staff now stands at more than 75 physicians and health care providers. Over the years, the people at Fannin Regional Hospital have built a strong reputation for providing quality care in the Tri-state area and we're proud of the status we've earned.

Occupational Therapy

Partnering with our Community

We are constantly striving to align Fannin Regional Hospital's services and programs with the community's needs – that's what community healthcare is all about. Over the last eight years, we have:

- Updated and expanded our physical, speech and occupational therapy to a new off-site location in 2007.
- Expanded and updated the nursery in 2006.
- Expanded and updated the medical/surgical unit, ICU, birthing center and surgical suites in 2005.
- Introduced a new OB/GYN wing in 2000.
- Over the last five years, we have recruited 13 new physicians and healthcare practitioners to our community.

Our Senior Circle and Healthy Woman programs are just two examples of health resources offered to the community as a way to disseminate important health information and tips to the community.
